

CLIENT CASE STUDY

Client Name:

Marcus *

Age:

37 Years

Country:

UK

Time Trying to Conceive (TTC):

4 Years

Case History Summary:

- Miscarriage
- Poor sperm motility
- Poor sperm morphology
- Borderline sperm concentration
- Minor injuries to the testes from playing sports over the years

Natural Treatment Summary:

Marcus got in touch with me a few months after his wife had a miscarriage. They've been trying to conceive for three years and his sperm analysis was showing poor motility and poor morphology. Marcus implemented many of the recommended dietary and lifestyle changes in the program. I prescribed practitioner grade supplements for him and his wife and suggested some additional changes and tests for the both of them. They followed the advice as closely as possible.

Length of Treatment:

1 Year

Clinical Outcome:

Birth of a healthy baby boy after a healthy full term pregnancy.
